

## Nancy Carlson, Author

ncarlsonag.ed@gmail.com

### **Water: Sources, Uses and Conservation**

For sales and book information go to [Agbooksforkids.com](http://Agbooksforkids.com) Carol Banks can help you with any of your questions .

Join Nancy for demonstrations and activities using the non-fiction book; **Water: Sources, Uses and Conservation**. The information will help students understand how the agriculture industry provides their food and fiber.

Nancy will use her book, **Water: Sources, Uses and Conservation** to give teachers “take away” ideas for classroom activities and resources. She will use hands on activities to:

- demonstrate the amount of water on, in and above the Earth
- show the states of water, the hydrologic or water cycle, and watersheds
- provide information on how the agriculture industry uses water to raise and grow the students’ food and fiber
