**Florida Department of Agriculture and Consumer Services created a map matching activity to go with this year’s Agriculture Literacy Day book.**

**Directions:**
This activity will allow students to match seafood and aquaculture species to the correct county according to the "Drive through Florida: Aquaculture and Seafood" Agriculture Literacy Day book.

- You will find four icons of each species on the "Seafood Icons" printable sheet. Print as many as are needed for students to have one each of the 12 icons.
- Cut out the icons or have the class participate as part of the activity.
- Print an "Aquaculture and Seafood Florida Map" for each student. The map is also available in 8 1/2" x 14" and 11" x 17 sizes.
- Write the name of the species and it's county on the board as the book is being read.
- Students will place the correct species on the correct county of their map with tape or glue sticks after the book is read.
