# So Many Options

Large Jenga games  
available at Target

Miniature Tumbling Tower  
games available at Dollar Tree

# Object of the Game

The object is to remove one wooden block each turn from the middle or bottom of the “Tumbling Tower” and place it on to without knocking over the tower. The game continues with players each taking a turn and answering agriculture questions until the tower falls.

# Game Suggestion

## **LET'S PLAY!**

Select one player to go first, then play continues to the left. Each player removes one block and places it on the top in the same crisscross way the tower was built. You may only use ONE hand. You may touch a block to see if it is loose. However, if you move this block and do not place it on top, you must put it back in its original position. Upon placing a block on the top of the tower successfully, the player chooses an Ag Jenga trivia card of the matching color (a blue block would correspond to a blue trivia card). If the player answers the question correctly, they may attempt to move a new block to be placed on top of the tower. If answered incorrectly, the next player repeats the steps until someone knocks down the tower, just like regular Jenga.
